

Kronometry 1999 select rpa:vision to deliver UK debut

Leading retail interiors specialist rpa:vision has been chosen by elite French watch retailer, Kronometry 1999, to deliver their first British presence in London's New Bond Street.

In the year of Kronometry 1999's 10th anniversary, the much anticipated London boutique opened just in time for Christmas and is build on the brand's strong presence in top European locations including Paris, Cannes, Monaco, St Tropez, Courchevel, Lyon and Bordeaux.

rpa:vision's delivery of stylish flagships for Alfred Dunhill in Mayfair as well as experience of bringing several international retailers into the UK, including American high-end outfitters Brooks Brothers in 2007, reveal some insight as to why Kronometry 1999 is trusting them with their debut project in the UK.

This new boutique will be the largest in the Kronometry 1999 group. For the customer: 4 private lounges to welcome you in a cosy atmosphere. For the manufactures : no less than 5 corners are to be installed, the usual suspended cubes will be found on the walls and the exterior windows will feature a brand new column concept.

The unrelenting eye for detail and timely delivery conveyed by rpa:vision's track record of retail design and roll out complement the impeccable qualities of the Kronometry1999 brand and the standards they expect for their first foray in the UK.

The arrival of a new premium brand to London is no doubt a welcome sign for British retail indicating that it remains one of the most desirable retail locations in the world.

Nigel Collett, CEO of rpa:vision says,

"We are very excited to be working with Kronometry 1999 as we share the same passion for quality, service and respect for expertise as they do. Working with one of Europe's finest watch retailers will also really put our promise of on time delivery to the test!"

Walter Ronchetti, founder of Kronometry 1999 comments,

" We are thrilled to be celebrating our 10th anniversary by opening a store in one of London's finest locations and who better to be assisting the launch of our British venture than rpa:vision. We are looking forward to working together."
